

## DECLARATION OF MR JAN ANDERSSON

1. I am CEO and President of ReadSoft AB of Sweden, assignee of the subject application, Application Number 09/381,899. I am familiar with the facts stated herein and could, if called as a witness in any proceeding concerning the application or any patent issuing therefrom, testify competently thereto.

2. A commercial software package covered by the subject application is being sold under the trademark EYES & HANDS INVOICES in the numerous countries, including Australia, Denmark, France, Germany, Norway, Portugal, Spain, Sweden, United Kingdom, and the United States. The INVOICES software package first appeared in the market in 1997.

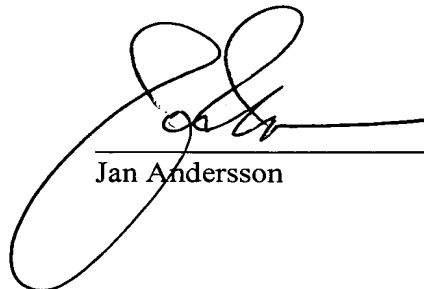

3. Since 1997, sales of INVOICES software has totaled over \$ 36 million of which almost \$ 3.5 million has been sold in the United States. This is very successful and the software's growth rate is robust 25 percent.

4. INVOICES software allows a customer to receive different invoice documents from all of its vendors and those invoices are inputted, by scanning or electronically, into the customer's data processing apparatus. The data processing apparatus interprets each document by its design features including lines, curves, logos and colors, if any. If a particular vendor's invoice has not been previously presented to the data processing apparatus, it is automatically registered. Thereafter, selected data content of the presented invoice is automatically read and stored in the data processing apparatus. INVOICES software also automatically stores selected data content if the vendor's invoice has been previously presented to the data processing apparatus.

5. To my knowledge there were no known direct competitive software to our INVOICES software until at least one year after our release and based on our own estimates ReadSoft maintains a share of at least 30 percent of the world market today.

I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct.

Executed on December 21, 2004
